

Graphic Designer - Mac

North Sydney - Marketing Agency

Synchro is an Award Winning Incentive Marketing Agency involved in designing and delivering performance improvement campaigns for a diverse range of market leading clients. We require an enthusiastic and self-motivated Graphic Designer with good communication skills and between 3 and 5 years Mac experience on branding, promotional or direct marketing projects – both print and digital applications.

You will need to be proficient with QuarkXPress/InDesign, Photoshop, Illustrator and Flash with the ability to work with an Agency Team dedicated to delivering a quality creative product from concept through to production. This will involve an integrated range of communication elements including brochures, flyers, newsletters and other collateral items – designed for both hard copy and online/ web execution.

This role will suit those Designers seeking to work in a dynamic performance driven team environment where creative and web design services are an integral part of the Agency's success. A Contractor wishing to work in-house would also be considered for this opportunity – provided they bring the right skills, experience and attitude to the Agency.

Written applications, giving details of your training, skills and web/print design experience should be directed to:
